

Read This Before Installing DrugPak v6!

- It is **not** possible to “revert” from DrugPak version 6.0 back to an earlier version.
- If you wish to try out DrugPak 6 before upgrading your live data, you can first try out the upgrade in a test environment. For more information, download the following document from our web site:
<http://drugpakupdate.zapto.org/dp60/testenv.pdf>
- Don't forget to back-up your DrugPak programs and data. You should back-up the entire DP50 folder (...Scanlon\dp50).
- After installing DrugPak 6, please read the “*What’s New in Version 6.0*” document. (You will be prompted to open this document when you first run DrugPak 6). You can also download this document from
<http://drugpakupdate.zapto.org/dp60/whatsnew60.pdf>
- The online help file and printable user's manual. From the DrugPak main menu, choose "Help > Contents" or "Help > Print User Manual." A single help file now includes help for all DrugPak modules!
- When you are ready to install DrugPak 6, please refer to the document “*DrugPak 6.0 Upgrade Guide,*” included in this packet.
